Pretty Crown Barber & Beauty Salon — Part 3 Changes Report

Module: WEDE5020 — Web Development

Student Number: ST10474370

Student name: Phuti Moketla

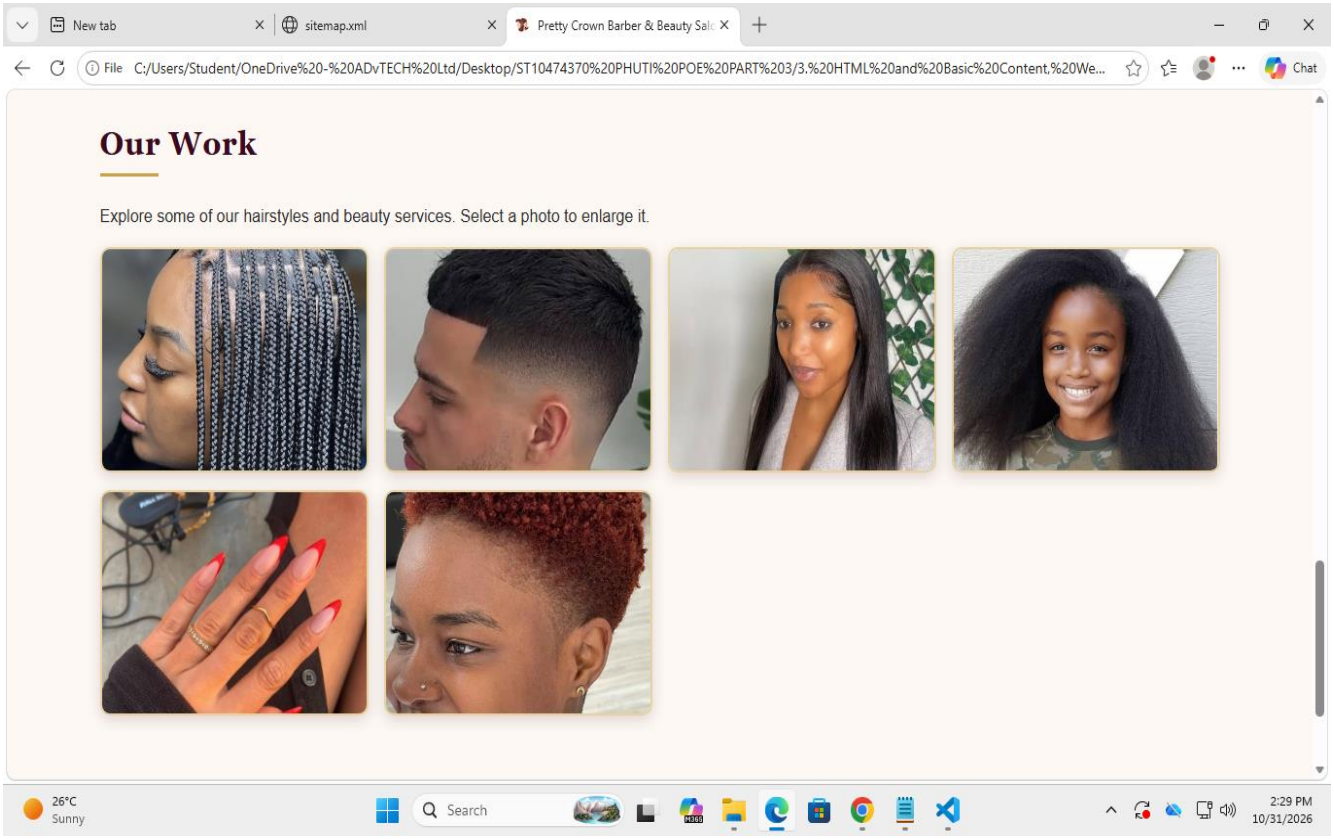

1. **Part 3 Functionality & JavaScript Updates**

All new interactive features were built using standard JavaScript inside a single external file (script.js):

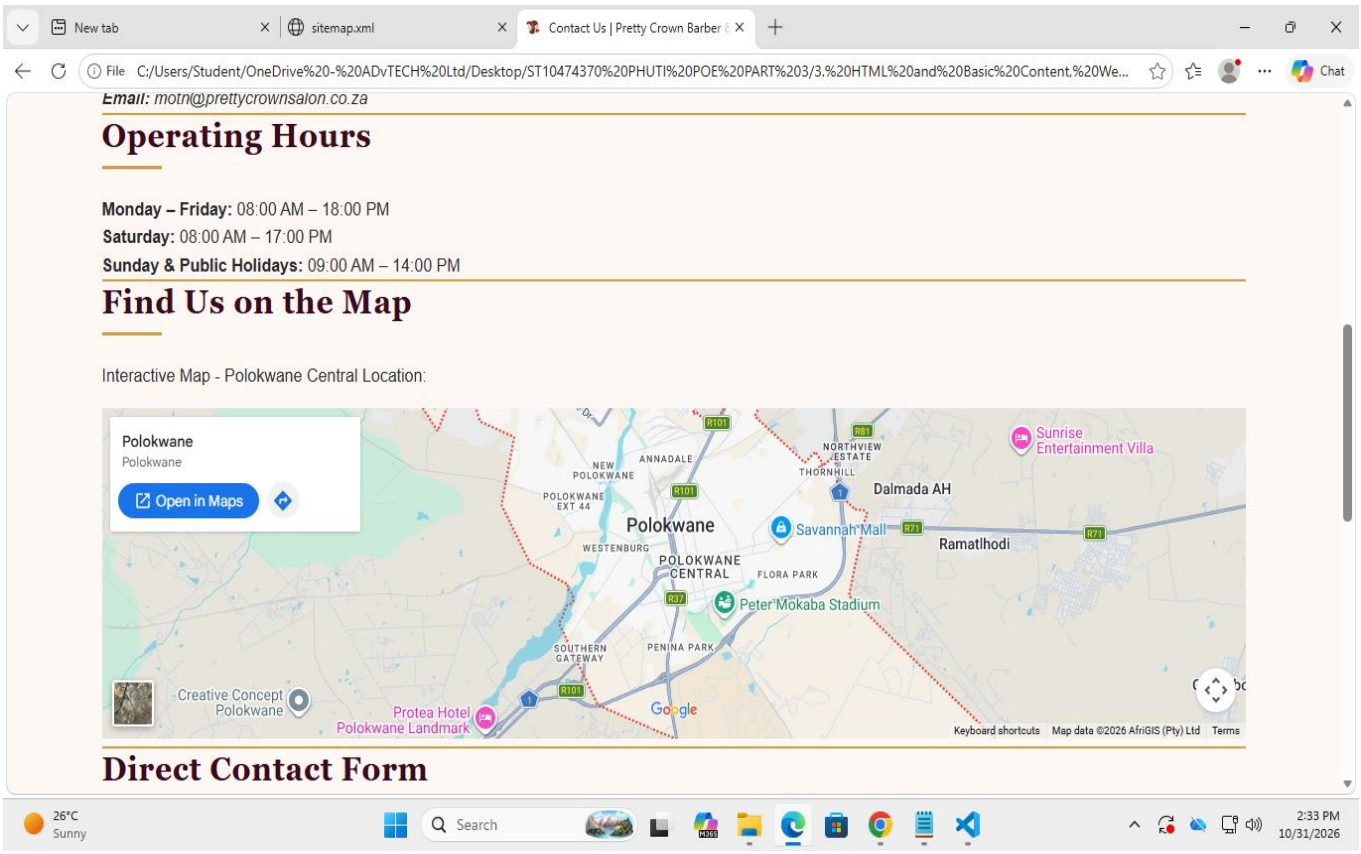

1.1 Interactive UI Features

1.2 Clickable Content Tabs (about.html): Users can click between “Our Story”, “Our Mission”, and “Our Team”. Only one panel displays at a time, making reading easy.

Photo Gallery Lightbox (index.html): Clicking any gallery photo opens an enlarged popup view. Users can zoom in, see estimated service prices, and move between photos using arrows or touch swiping.

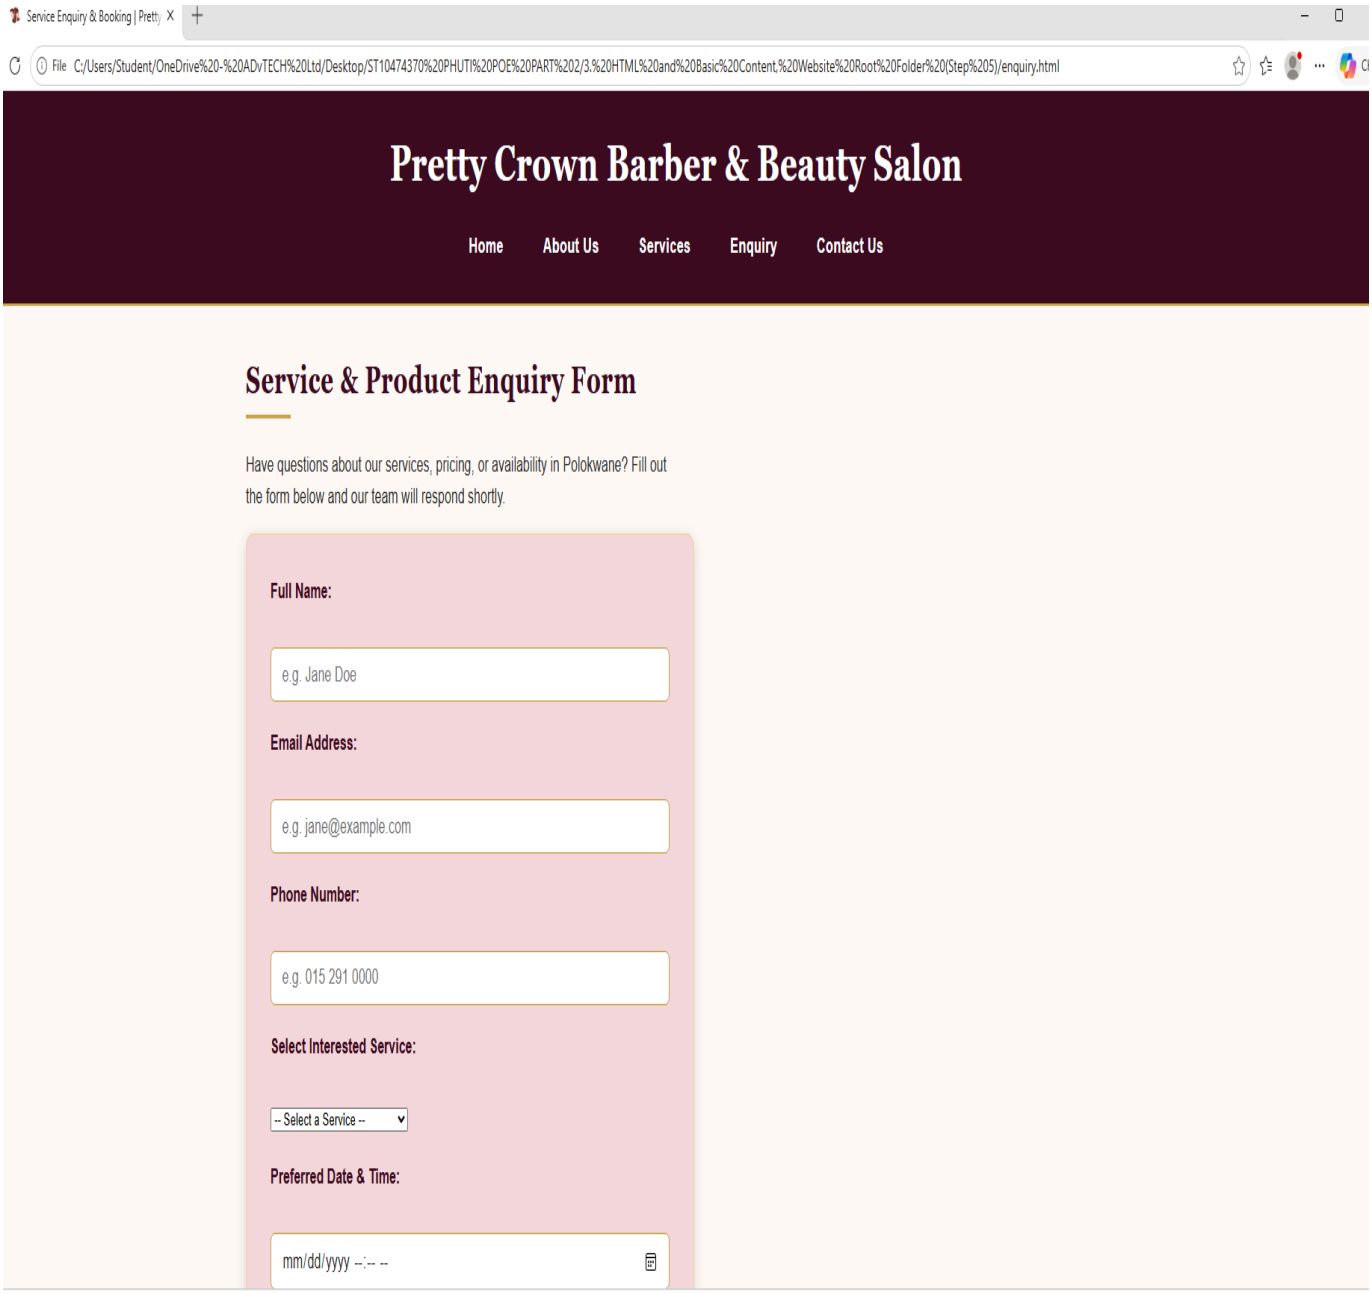

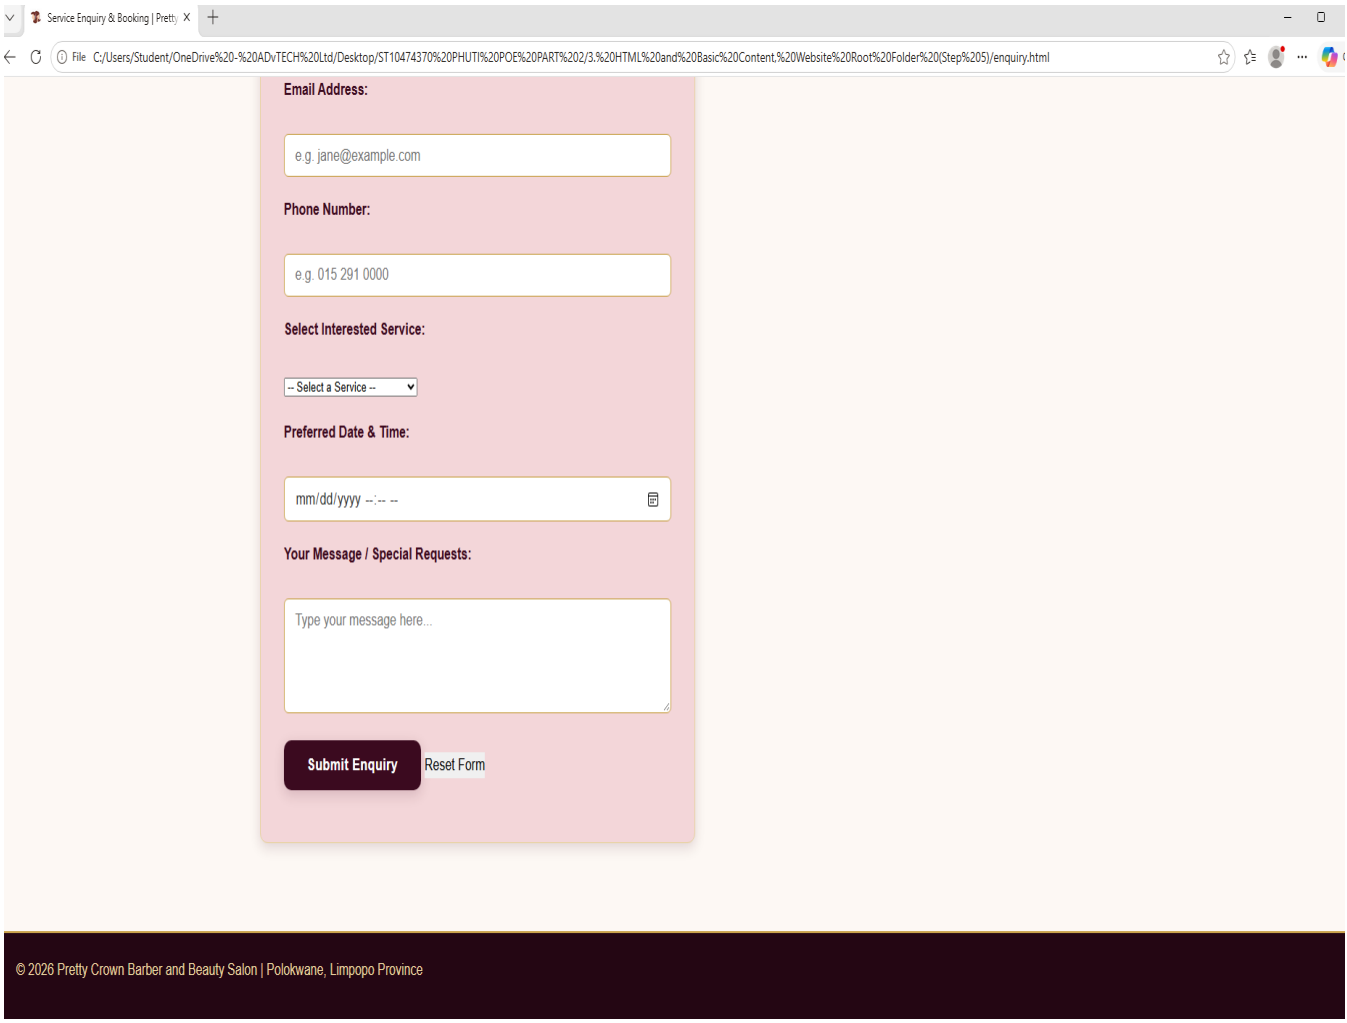

Interactive Map (contact.html): An open-source Leaflet map shows the exact location of the salon in Polokwane.

1.3 Dynamic Content & Filtering (services.html)

1.4 Interactive forms: the enquiry and contact us form are interactive and allows users to fill in their details, select services, dates and time as well as submitting the form.

Have questions about our services, pricing, or availability in Polokwane? Fill out the form below and our team will respond shortly.
Full Name:
e.g. Jane Doe
Email Address:
e.g. jane@example.com
Phone Number:
e.g. 015 291 0000
Select Interested Service:
-- Select a Service --
Preferred Date & Time:
mm/dd/yyyy --:-- --

1.5 Proper heading structure (<h1> to <h3>).

Open Graph tags for social media link sharing.

Descriptive alt tags on images for accessibility and search engines.

1.6 Technical Files (robots.txt and sitemap.xml)

1.7 Two new files were added to the root directory:

Robots.txt: Instructs web crawlers that all public pages on phutimoketla.github.io may be indexed and provides the link to the sitemap.

Sitemap.xml: Lists all 5 page URLs (index.html, about.html, services.html, enquiry.html, contact.html) along with their last update dates and importance rankings.

2. Form Validation & Email Processing

2.1 Client-Side Validation Rules

2.2 The forms on enquiry.html and contact.html validate input in real-time before submission:

Name: Must be at least 2 characters and contain valid name letters.

Email: Must match standard email formatting (name@example.com).

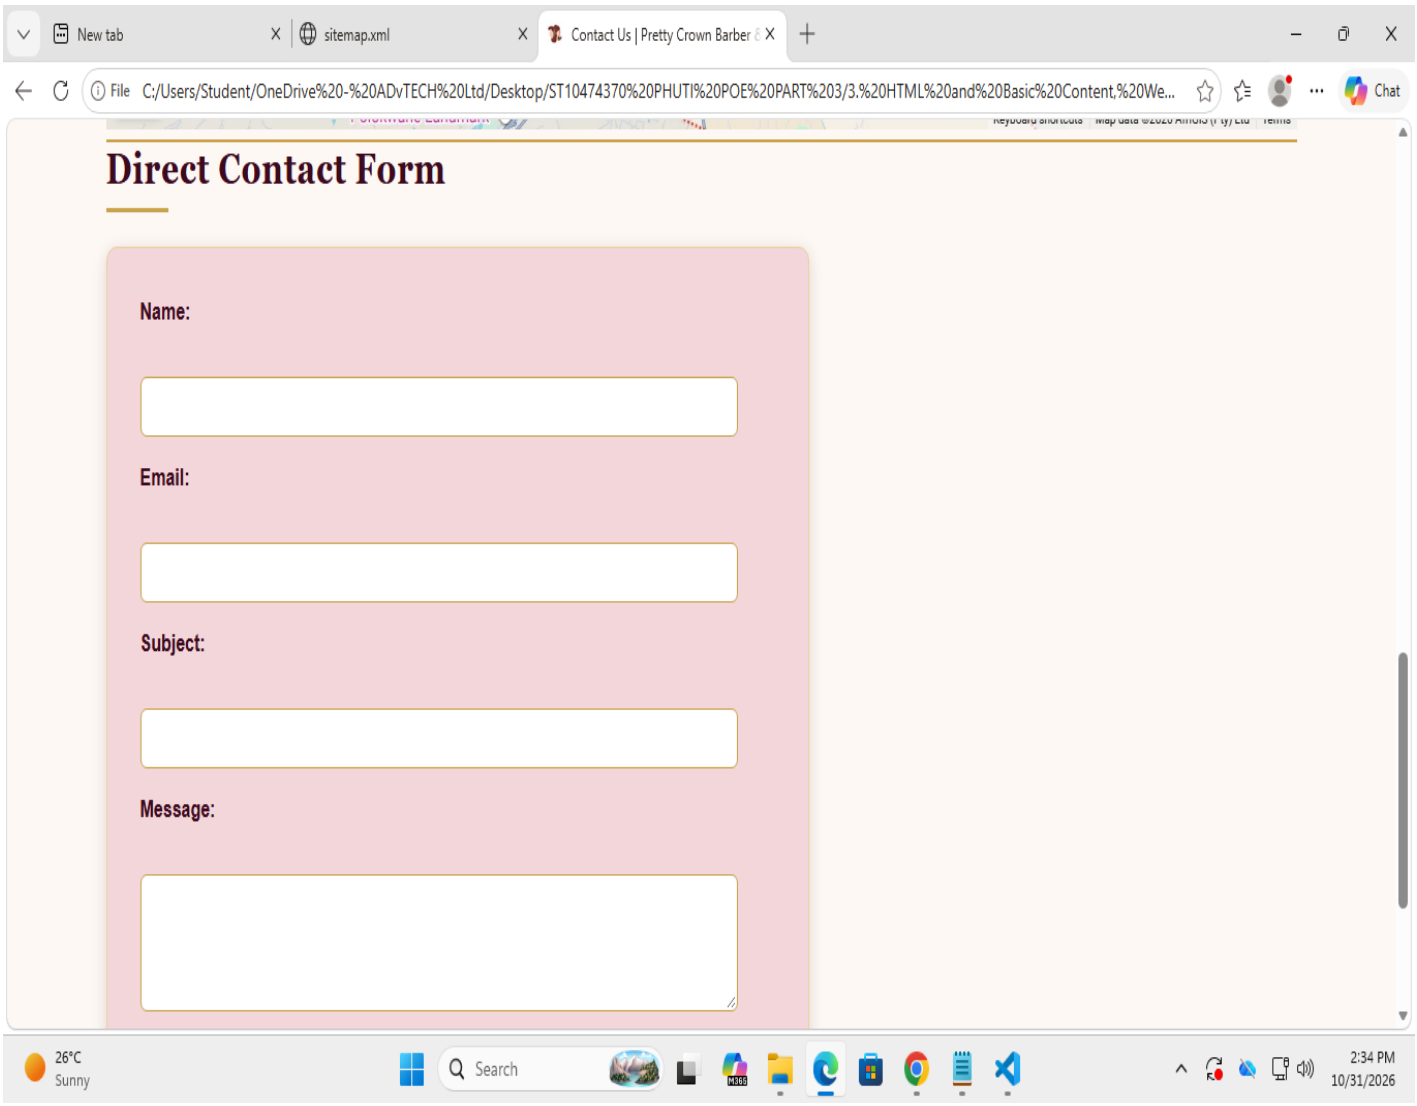

Phone Number: Must match valid South African phone number patterns (e.g., 071 234 5678).

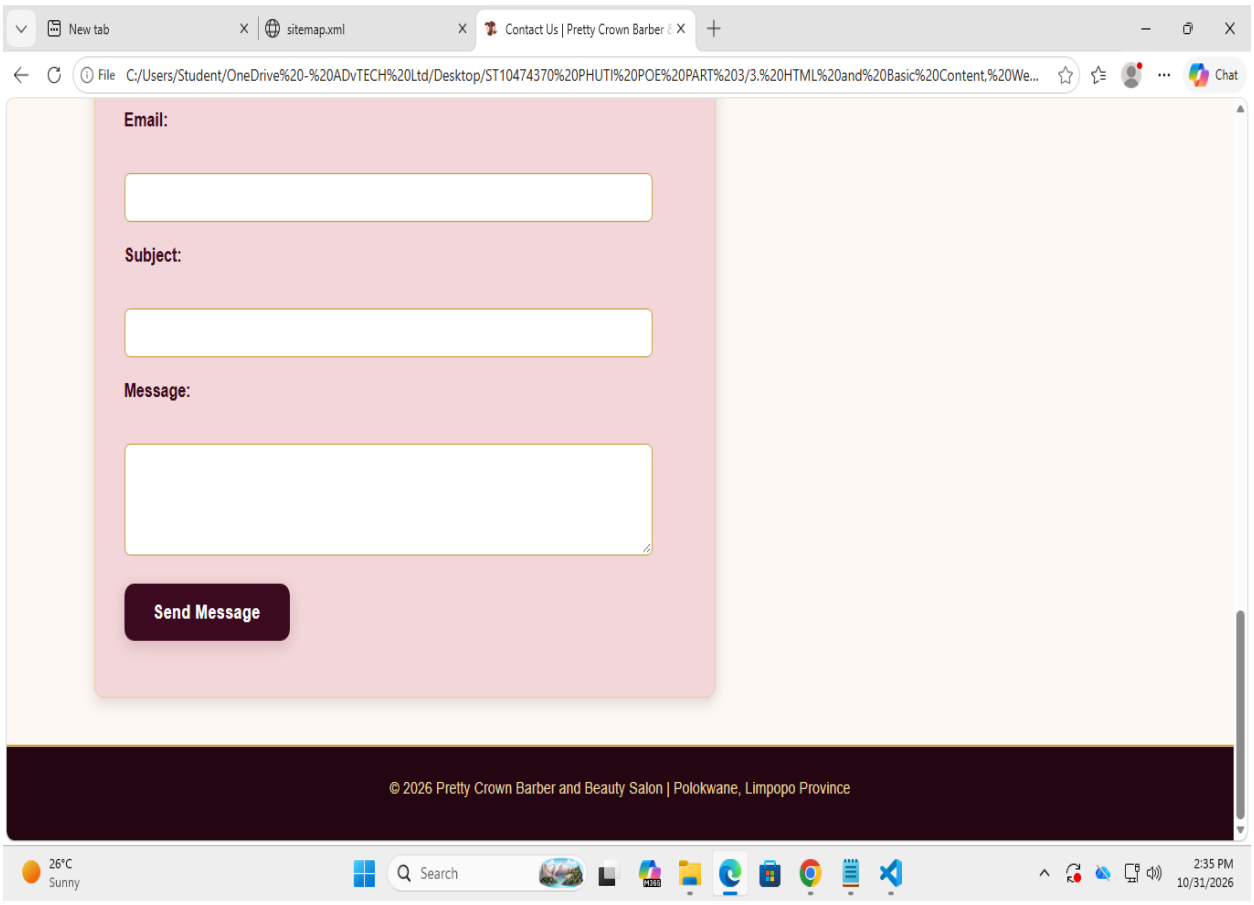

Date & Time: Ensures dates are not set in the past or on Sundays when the salon is closed.

2.3 Form Output & Email Draft Compiler

2.4 Enquiry Form (enquiry.html): When submitted, JavaScript calculates an estimated price, verifies if the requested slot falls within opening hours, and displays a summary box with a reference number.

Contact Form (contact.html): Form inputs are formatted into an email draft. Buttons allow the user to launch their default email app, open Gmail, open Outlook, or copy the formatted text.
